Biological Consultants

Forsiden: Udsigt over en del af den isdækkede Jørgen Brønlund Fjord set fra syd med Okse-sletten i forgrunden og Buen og Børglum Elv overfor. (Foto: Ole G. Norden Andersen, 23. juni 1968).

STATUS OVER DYRE- OG PLANTELIVET I NORDGRØNLAND
(HUMBOLDT GLETSCHER - INDEPENDENCE FJORD)

DEL 4: RÅDATA FOR PATTEDYR

Rune Dietz & Ole Gorm Norden Andersen

Rapport til

Råstofforvaltningen for Grønland og
Grønlands Fiskeri- og Miljøundersøgelser

Fra

Danbiu Aps. (Biologiske Konsulenter), Henningsens Allé 58, 2900 Hell.

- Juni 1984 -

INDHOLDSFORTEGNELSE:

Forord.....	1
Stednavne og Kort.....	2
Del A(artsnavne,lokalitetsnavne,dato og obs. -sortering).....	30 pp.
Del B(lokalitetsnavne,artsnavne,dato og obs. -sortering).....	50 pp.

Forord:

Del 4 i rapportserien om dyre- og plantelivet i Nordgrønland indtager en noget selvstændig status, idet den ikke som de tre foregående rapporter opsummerer de tiligere observationer i prosaform, men derimod kun præsenterer rådata for pattedyrene.

Rådataene, der både indbefatter publicerede og upublicerede oplysninger, var af en sådan mængde og karakter, at en EDB-behandling med fordel kunne benyttes. To eksempler på denne anvendelse er præsenteret i nærværende rapport, hvor observationerne er sorteret og udskrevet.

Del A: Dataene er først opdelt alfabetisk indenfor de omhandlede arter (lat. navne), hvorefter der er foretaget en sortering efter lokalitetsnavne (i det omfang der findes navne ellers benyttes Lgd/Brd angivelse), dernæst er dataene sorteret kronologisk for endelig at blive sorteret efter observatøren og udskrevet.

Del B: I denne del er der først foretaget en sortering efter lokalitetsnavnene, således at man for enhver af de omhandlede lokaliteter, hurtigt kan danne sig et overblik over, hvilke arter der forekommer på hvilke lokaliteter. Efter lokalitetsopdelingen følger en lignende opdeling, som blev benyttet i Del A, nemlig artsvis, kronologisk og observatør/forfatterbaseret opdeling og sortering hvorefter, der er foretaget en udskrift.

Ud over de oplysninger som sorteringsmekanismen er baseret på, er der udskrevet oplysninger om antal af dyr samt en evt. kommentar til observationen.

Disse rådata, som er trykt i et meget begrænset antal (50 stk.), er tænkt som et arbejdsredskab for folk, der fremover skal arbejde med vurderinger af bestandssammensætninger og størrelser af pattedyr i Nordgrønland. Listerne kan desuden være nyttige, som en slags feltguide over pattedyr under biologisk feltarbejde i Nordgrønland. Endelig kan disse oplysninger betragtes, som et første forsøg på en standardiseret indsamling og formidling af biologiske oplysninger via EDB-hjælpemidlet. En standardisering af oplysninger vil utvivlsomt være påkrævet ved fremtidig forskning i Nordgrønland og i Grønland som sådan.

Listerne må ikke betragtes som "endelige", idet der er folk vi ikke har modtaget oplysninger fra, og endelig har opgavens begrænsede tidsrum sat en deadline for indføring, af de til stadighed indløbne oplysninger.

Stednavne og Kort:

Til brug af databasen er der udarbejdet et kort med de nævnte lokalitetsnavne for det nordgrønlandske statusområde.

En alfabetisk udskrift er foretaget ud fra de i listerne angivne lokaliteter. Ud for hver lokalitetsnavn er angivet et nummer, som findes på den givne lokalitet i de to kort over Nordgrønland (fig. 1 og 2).

Ønsker man et hurtigt overblik over pattedyrenes udbredelse henvises til del 1. i serien, hvor der for hver enkelt art er tegnet et kort med angivelser af antal observerede dyr.

De benyttede kort er udført af Geodætisk Institut.

Tabel 1. Lokalitetsnavne udskrevet i alfabetisk rækkefølge og nummereret fra databasen over pattedyrene.
