List of recoveries	5

Introduction

Each year a considerable number of birds banded abroad are recovered in Denmark. Some people forward rings or wing-tags directly to the foreign ringing stations, others send them, together with the relevant recovery data, to the Zoological Museum, University of Copenhagen, or to the Game Biology Station, Kalø. These institutions forward the information to the foreign ringing stations and inform the finder when they receive the ringing data from abroad. Also, the Zoological Museum and the Game Biology Station keep files of these recoveries.

When ADELHOLT (1958) and PETERSEN & PREUSS (1959) published their lists of recoveries in Denmark 1950–55 of birds ringed abroad, the Game Biology Station placed its files at their disposal. In the period 1955–64 the Game Biology Station has received and forwarded 681 foreign rings and wing-tags, and in the following

the banding and recovery data for these birds will be listed.

The 681 recoveries are distributed over 76 species which are here listed in taxonomic order according to LØPPENTHIN (1946, 1956). The birds were banded in 11 different countries, i.e., Belgium, Finland, France, Great Britain, Iceland, the Netherlands, Norway, Sweden, Switzerland, U.S.S.R., and Western Germany.

For each species the recoveries are *primarily* arranged according to banding country (in alphabetical order as above). Some countries operate several ringing stations, and where this is the case the recoveries are *secondly* arranged according to this. Rings and wing-tags from each ringing station are listed by number.

Information on age and sex received from the ringing stations is given in the lists (the British term »full grown« is however listed as »ad.«).

The following symbols indicate reason for recovery.

De følgende symboler markerer genmeldingsårsagen.

- + shot or killed by man (*skudt eller på anden måde dræbt af mennesker*).
- × found dead or dying (*fundet død eller døende*).
- × (s) found as skeleton (*fundet som skelet*).
- V trapped and released with ring (*fanget og losladt med ring*).

() trapped and released without ring (*fanget og losladt uden ring*).

/?!/ manner of recovery unknown (*nærmere omstændigheder ved fundet ukendte*).

Dates in brackets refer to the date of the reporting letter in cases when the finder has not given the date of recovery.

Datoer i parentes refererer til indsenderens afsenderdato.

Dansk resumé

Liste over genmeldinger fra Danmark af fugle ring- eller vingemærket i udlandet, ekspederet gennem Vildtbiologisk Station 1955-1964.

Hvert år modtager Vildtbiologisk Station, Kalø, Rønde, en del udenlandske ringe og vingemærker fra fugle, som er nedlagt eller fundet i Danmark, og der føres et kartotek over sådanne fugles mærknings- og genmeldingsdata. ADELHOLT (1958) og PETERSEN & PREUSS (1959) udnyttede de oplysninger, der fandtes i kartoteket indtil 1954, medens det her præsenterede materiale omfatter data, der er

indsamlet af Stationen indtil 31.12.1964. Materialet omfatter 681 genmeldte fugle fordelt på 76 arter, som er nævnt i systematisk rækkefølge efter LÖPPENTHIN (1946, 1956). Fuglene er mærket i 11 forskellige lande.

I listerne er anvendt køns- og aldersbestemmelser, som er brugt af de respektive mærkningsstationer, dog er det engelske »full-grown« erstatet af »ad.«.

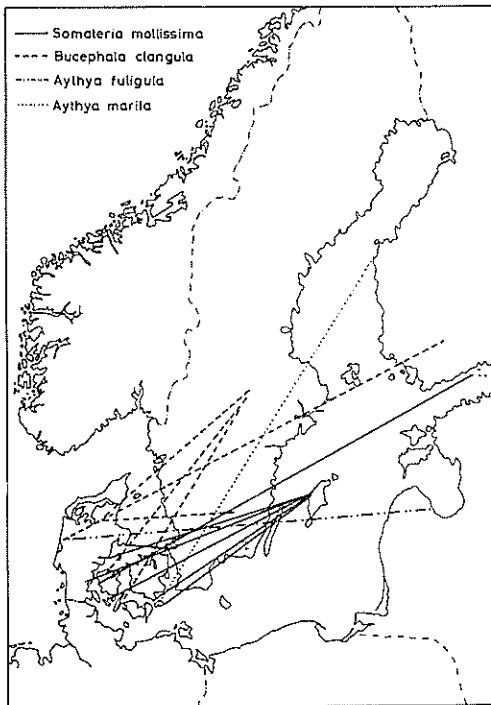

Fig. 1. Banding and recovery localities for diving ducks, some of which were banded as ducklings, others as adults during the breeding period.

Fig. 1. Mærknings- og genmeldingslokalitet for dykænder (Ederfugl, Hvinand, Troldand og Bjergand), hvoraf nogle er mærket som ællinger, andre som voksne i yngletiden.

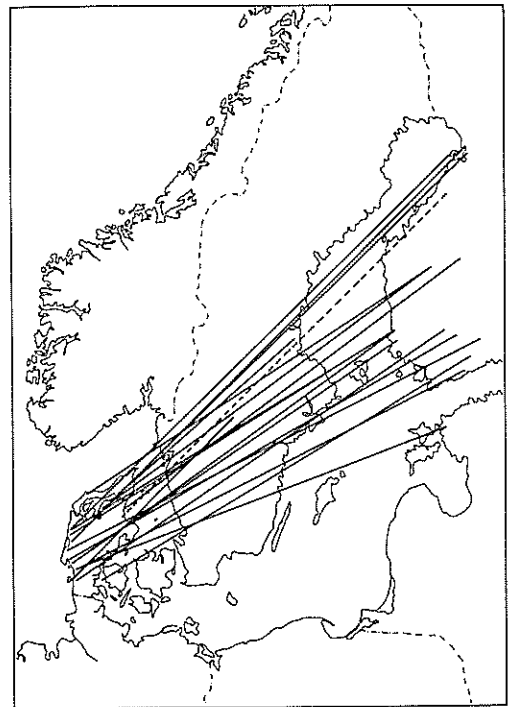

Fig. 2. Banding and recovery localities for 19 *Numenius arquata* banded as young (—) and for one banded during the fall migration (-----).

Fig. 2. Mærknings- og genmeldingslokalitet for 19 Storspover (*Numenius arquata*), der er ringmærket som unger (—), og for én fugl, som blev mærket under efterårstrækket (-----).

Резюме на русском языке:

Находки птиц из Дании 1955–1964, окольцованных или помеченных на крыльях за границей.

Список содержит данные о пометках и о сообщениях, посланных в течение периода 1955–1964 г. через Станцию Исследования Биологии Дичи в Калэ у города Рэнде, Дания (The Game Biology Station). Список включает 681 птицу, и они распределены на 76 видов. Материал составляет только ограниченную часть всех сообщений в Дании за указанный период. При описании основания сообщения применяются международные символы (см. стр. 3).

DANISH REVIEW OF GAME BIOLOGY

The journal is published and distributed by the

Game Biology Station, Kalø, Rønde, Denmark

Each paper is issued separately and when a number of papers have appeared (comprising 200-300 pages) these will be collected in a volume together with a table of contents. The price will be set separately for each volume. For volume 5 it will be 50 Danish Kroner. A limited number of back volumes (vols. 1-4) are available at a price of 50 Danish Kroner per volume.

Vol. 1.

- Part 1. Holger Madsen: The species of *Capillaria* parasitic in the digestive tract of Danish gallinaceous and anatine game birds. pp. 1-112. 1945.
- Part 2. Marie Hammer: Investigations on the feeding-habits of the House-sparrow (*Passer domesticus*) and the Tree-sparrow (*Passer montanus*). pp. 1-59. 1948. M. Christiansen and Holger Madsen: *Eimeria bucephalae* n. sp. (Coccidia) pathogenic in Goldeneye (*Bucephala clangula* L.) in Denmark. pp. 61-73. 1948.
- Part 3. Holger Madsen: Studies on species of *Heterakis* (Nematodes) in birds. pp. 1-43. 1950.
F. Jensenius Madsen and R. Spärck: On the feeding habits of the Southern Cormorant (*Phalacrocorax carbo sinensis* Shaw) in Denmark. pp. 45-76. 1950.

Vol. 2.

- Part 1. Holger Madsen: A study on the Nematodes of Danish gallinaceous game birds. pp. 1-126. 1952.
- Part 2. Johs. Andersen: Analysis of a Danish Roe-deer population (*Capreolus capreolus* (L.)) based upon the extermination of the total stock. pp. 127-155. 1953.
- Part 3. F. Jensenius Madsen: On the food habits of the diving ducks in Denmark. pp. 157-266. 1954.

Vol. 3.

- Part 1. Johs. Andersen: The food of the Danish Badger (*Meles meles danicus* Degerbøl). pp. 1-76. 1954.
- Part 2. Carsten Pedersen: Cycles in Danish Vole populations. pp. 1-18. 1957.
F. Jensenius Madsen: On the food habits of some fish-eating birds in Denmark. pp. 19-83. 1957.
Johs. Andersen: Studies in Danish Hare-populations. I. Population fluctuations. pp. 85-131. 1957.
- Part 3. Third congress of the international union of game biologists. Transactions. pp. 1-166. 1958.
Knud Paludan: Some results of marking experiments on Pheasants from a Danish estate (Kalø). pp. 167-181. 1958.
Marie Hammer, M. Køie and R. Spärck: Investigations on the food of Partridges, Pheasants and Black Grouse in Denmark. pp. 183-208. 1958.

Vol. 4.

- Part 1. Knud Paludan: Results of Pheasant markings in Denmark 1949-55. pp. 1-23. 1959.
Knud Paludan: Partridge markings in Denmark. pp. 25-58. 1963.
Mette Fog: Distribution and food of the Danish Rooks. pp. 61-110. 1963.
- Part 2. H. Strandgaard: The Danish bag record I. pp. 1-116. 1964.
- Part 3. Jørgen Fog: Dispersal and Survival of Released Mallards. (*Anas platyrhynchos* L.). pp. 1-57. 1964.
Jørgen Fog: The Mallards from the Estate of Kongsdal. pp. 61-94. 1965.
P. J. H. van Bree, Birger Jensen, L. J. K. Kleijn: Skull Dimensions and the Length/Weight Relation of the Baculum as Age Indications in the Common Otter. pp. 97-104. 1966.
Helge Walhovd: Reliability of Age Criteria for Danish Hares (*Lepus europaeus* Pallas). pp. 105-128. 1966.

Vol. 5.

- No 1. Mette Fog: An Investigation on the Brent Goose (*Branta bernicla*) in Denmark. 40 pp.
